

# Freelance Security Assessment Proposal

## 1. Introduction

My name is Ahmed Ali Mostafa Mohamed, a freelance penetration tester and vulnerability analyst with practical experience in Bug Bounty programs and web application security testing. I am also a scholar in the Digital Egypt Pioneers Initiative, which has enriched my skills in advanced cybersecurity domains.

I am submitting this proposal to perform a security assessment of the Juice Shop platform as part of your project 'Security Assessment for an Online Shop 2'.

## 2. Understanding of the Task

You require a security evaluation of your Juice Shop instance at:

<https://juice-shop.herokuapp.com/>

Objectives include:

- Locating the Score Board path
- Solving challenges: Deprecated Interface, View Basket, DOM XSS
- Identifying at least one critical vulnerability
- Providing a detailed Proof of Concept (PoC) report

## 3. Tools & Methodology

Tools to be used:

- Burp Suite Pro
- SQLmap

## **Freelance Security Assessment Proposal**

- Manual testing techniques

Methodology:

- Based on OWASP Testing Guide
- Unauthenticated and authenticated testing
- Business logic analysis
- Client-side vulnerability testing

### **4. Timeline**

The assessment will be completed within 2 days:

- Day 1: Reconnaissance, scanning, and manual testing
- Day 2: Validation, documentation, and PoC report writing

### **5. Payment Terms**

Total Cost: \$200 USD

Payment Terms:

- 25% upfront payment before starting (\$50 USD)
- 75% upon delivery of the final report (\$150 USD)

Payments can be made via PayPal or bank transfer.

### **6. Deliverables**

## **Freelance Security Assessment Proposal**

- Detailed vulnerability assessment report with screenshots and PoC
- Clear remediation recommendations for each identified issue
- Optional online meeting to explain the findings and how to secure them

### **7. Communication & Support**

I am available across multiple communication channels and can schedule a live meeting anytime to discuss the findings or clarify the process.

In addition to identifying vulnerabilities, I will also provide secure remediation methods and support in fixing the discovered flaws.

### **8. Contact Information**
